Architecture Health Summary

Executive Summary

Executive Summary: Architecture Health Assessment

Critical Status: Immediate Leadership Attention Required

Our architecture portfolio of 2 projects is currently at **critical risk** with an overall health score of **0.0/100** and a risk score of **100.0/100**—the maximum severity level. The assessment has identified **384 total findings**, including **10 critical** and **112 high-severity** issues, with only 1 finding resolved to date. While our Well-Architected Framework scores show strength in Cost Optimization (94.9%) and Performance Efficiency (94.8%), significant gaps exist in Reliability (58.0%), Security (60.0%), and Operational Excellence (66.0%), indicating fundamental architectural weaknesses that require immediate remediation.

Compliance posture presents material risk with an overall score of **65.2%**, falling short of acceptable thresholds across all measured frameworks. NIS2 compliance at 51.5% and GDPR at 62.7% represent the most significant regulatory exposure, while SOC2 (82.5%) and ISO 27001 (64.1%) require continued attention. Ten compliance gaps have been flagged as top priorities for remediation.

Recommended Actions: Leadership should authorize an immediate remediation sprint focused on the 10 critical findings, establish a task force to address the 112 high-severity issues within the next 30-60 days, and prioritize closing NIS2 and GDPR compliance gaps to mitigate regulatory risk. A follow-up assessment should be scheduled within 90 days to validate progress and reassess portfolio health.

Portfolio Health

Health Score 0.0/100	Total Projects 2	Total Findings 384	Resolved 1
--------------------------------	----------------------------	------------------------------	----------------------

WAF Pillar Scores
